

Are you excited about emergencies? Invigorated by intensive care?

Lumbry Park are pleased to announce we are ready to invite two interns to join our growing Emergency and Critical Care team.

Lumbry Park is undergoing enormous redevelopment and expansion which includes the launch of a brand new dedicated ICU facility. We have two passionate critical care specialists and a team of enthusiastic and friendly supportive nurses who will be working to provide gold standard care to our sickest patients in a well-equipped and modern space.

The hospital offers a truly multi-disciplinary team with whom the ECC service collaborate daily to ensure patients get the best of care thereby offering an excellent learning environment for interns early in their career. The specialist ECC internship will provide an excellent foundation from which to apply for further specialist training in the field.

Our ECC interns will complement our team of rotating and service-specific interns and also work alongside a cohort of six rotating interns. Shifts will include a mix of days, nights and weekends in a primary case seeing and patient management capacity with either direct or telephone support. Teamwork, communication, and a positive approach are essential. We expect hard work and commitment from our staff but insist upon having fun along the way.

Lumbry Park is situated in beautiful Hampshire near the historic market town of Alton. The countryside is exceptionally beautiful for walking, running, biking and horse riding. We are only an hour from London and 40minutes from the coast. For literature lovers, Jane Austen's house is 5 minutes away! Don't miss this once a year opportunity!
